

RFP Response: Orbit Digital

Procurement Request: Enterprise Workflow Automation Platform

All information in this proposal is fictional and created for evaluation purposes.

1. Executive Summary

Orbit Digital brings the deepest relevant experience: 25 enterprise automation programs, including 5 in your industry, with strong client references.

Our approach leans on proven playbooks and senior talent. We propose a pragmatic platform on Google Cloud with a focus on user adoption.

- Most experienced bidder with verifiable references and senior team.
- Medium pricing with flexible commercial terms.

2. Proposed Solution & Technical Approach

Platform: Google Cloud Run + Workflows, Cloud SQL, Pub/Sub, Angular portal. Sound managed-service choices.

Integrations: description is vague – states 'seamless integration with SAP, Salesforce, and Okta via APIs' but provides no connector details, no sequence diagrams, no error-handling description.

Scalability: mentions autoscaling; no load-test evidence included. Statement: 'expected to handle required load.'

- Gap: integration plan lacks specificity – adapter maturity, data mapping, and cutover approach are not documented.
- Strength: UX approach is well described with design system and usability testing plan.

3. Implementation Plan & Timeline

20-week plan: Discover (4 wks), Build (10 wks), Test (4 wks), Launch (2 wks).

Phase	Duration	Milestones
Discover	Wks 1-4	Blueprint sign-off
Build	Wks 5-14	Workflows iteratively released
Test & Launch	Wks 15-20	UAT, cutover, hypercare (30 days)

Team: senior-heavy – 1 partner sponsor, 1 architect (15 yrs), 4 engineers, 1 UX lead. Bios included.

Risk plan: moderate – 8 risks listed; integration risk acknowledged but mitigation is generic ('close collaboration').

4. Commercials & Price Table

Item	Cost (USD)
Implementation	\$375,000
Licenses Year 1	\$95,000
Support Year 1	\$50,000
Total Year 1	\$520,000

Assumptions: reasonable; 90-day price validity; T&M; for out-of-scope at \$190/hr.

Medium pricing. 3-year TCO ~\$1.18M. Flexible payment milestones tied to acceptance.

Discount: 5% for upfront annual payment.

5. Security, Compliance & Risk Controls

Certifications: ISO 27001:2022, SOC 2 Type II. Cloud Security Alliance STAR listed.

Controls: VPC-SC, Cloud KMS, Binary Authorization, MFA enforced. Annual pen tests; latest summary available on request.

Privacy: GDPR compliant; DPA available. Data residency in us-central1.

Auditability: Cloud Audit Logs with 400-day retention; SIEM export supported.

Overall solid, though integration-specific security (e.g., SAP credential vaulting) is not detailed.

6. Support Model, Experience & References (Strongest Experience)

Support: 24/7, 99.9% SLA, 20-min P1 response, dedicated success manager, adoption playbooks.

Experience: 25 enterprise programs; 5 in manufacturing/logistics; 3 with 10k+ users. Industry awards listed.

References: three detailed references with named contacts, project sizes, and outcome metrics – the most convincing in this set.

- Reference 1: National distributor – 11,000 users, 98% adoption.
- Reference 2: Industrial firm – SAP + Okta integration (note: Salesforce was not in scope there).

Team tenure averages 7 years; low attrition cited.
